# Domestic Support

- Since last JMAC in FEB, the NVNG has been requested by NVDEM 13 times.
- 152<sup>nd</sup> AW deployed MAFFS-equipped C-130s to support fire fighting efforts in CA and CO.
- MAFFS (Modular Airborne Fire Fighting System) is capable of dispensing 3,400 gallons of fire retardant solution that creates fire breaks during large scale fires. It is one of the most requested National Guard resources in the country.
- 92<sup>nd</sup> CST conducted pre-event hazard sweeps for NASCAR, Electric Daisy Carnival, and the Tahoe Celebrity Golf Tournament and responded to 4 calls to identify/dispose of suspected/confirmed hazardous material.
- Rotary wing assets responded to several local/regional wildfires and provided medical aid to two stranded hikers in Douglas County.
- NVNG Counter-Drug TF assisted LEAs with finding/seizing an average of \$150 million worth of illegal drugs per year over the last 3 years.

# Shortfalls

- Operational requirements (time/airspace/increasing SDZs), combined with increased range requirements for NVNG, make using NAS Fallon and Nellis/Creech AFB ranges less feasible.
- Pursuing long-term lease (25+ years) with Hawthorne Army Depot to allow for pursuing MILCON for a multi-purpose machine range and an automated record fire range.
- NVNG would like a site at Creech or Nellis AFB within 1000' of an active runway for rotary wing aviation assets.
- NVNG would also like 4 x 1500 SF classrooms (or space to build temporary structures) at Nellis AFB to instruct 10 communications and NCO professional development courses each year.
